

Rolls-Royce & the University of Naples "Federico II" are delighted to announce that a Virtual Career Event will take place on the 5th November 2021 with the aim to inspire undergraduates and graduates to start a successful career at Rolls-Royce.

What Do We Make at Rolls-Royce?

Rolls-Royce is known the world over for delivering excellence, creating high-performance, integrated power solutions for use on land, at sea and in the air and is currently looking for outstanding young talents to join its Internship and Graduate Development Programmes.

Opportunities at Rolls-Royce

Rolls-Royce Internship and Graduate opportunities are now available on the Rolls-Royce website <https://careers.rolls-royce.com/uk-kingdom/students-and-graduates>.

At Rolls-Royce, you'll have the chance to work with different teams across the product and service lifecycle and will be involved in innovating, concept development, architecting and designing products and systems, testing, manufacture or service support.

Our Programmes

Join our re-imagined graduate and intern development programmes and you'll have a crucial role to play in shaping the future of a truly iconic business. Based in either Civil Aerospace, Defence, or in our central Innovation and Digital hubs, Group IT or Group Business Services, our new learning-focused programmes focus on giving you real-world experiences and the chance to work on live projects across our engineering, digital and business functions.

As a graduate, whether you join us on our Business and Enterprise, or Engineering and Technology programme, you'll have the flexibility to curate your own experience. You'll develop your own understanding of the opportunities within our business before you specialise in an area of expertise. It's all about growth, and how we can help you find the best fit.

Our 12-month internships offer a similar experience, and our 10-week summer internships provide a fantastic insight into life and work at Rolls-Royce. We also offer 6-month internships for students where this fits better with your university course requirements. View our 12-month internships for details. Internships can be a direct route onto a graduate programme.

What You Need

We're open to degrees in any subject. What's most important to us is that you live and breathe our values (Trust, Integrity and Safety) and behaviours (Agile, Bold, Collaborative and Simple) and want to shape the future of our business. You'll also need

A passion for the future of sustainable power and the work you do

An open-minded, curious, collaborative and agile approach to problem-solving and in developing the skills to bring out the best in the people around you

Initiative and adaptability to build your desired career, with support from our leaders

We'll provide you with a fantastic framework and all the opportunities you need to progress, but it'll be up to you to lead own your development. So you must be full of initiative, adaptable, eager to learn and driven to succeed.

Key Requirements

To apply for the graduate and internship programmes at Rolls-Royce, candidates need to meet the following requirements:

- Fluency in English. Other languages highly desirable
- For all graduate programmes, a bachelor's/master's degree (or equivalent) in a relevant subject achieved by August 2022
- Previous work experience (required for graduates and desirable for interns)
- For internship programmes a degree it is not required, but being a student is a must
- CV written in English

The Virtual Event

On the day of the event, a few members of the Rolls-Royce University Campus Team will present the opportunities that are available for both interns and graduates, share their experiences and insights, and give answers to your questions.

As always, a time slot will be dedicated to a CV workshop, with the possibility for 1-to-1 CV Reviews.

Note that the entire event, including the 1-to-1 CV Reviews, will be conducted in English.

What Are You Looking For?

If you meet the above requirement, are passionate about the company and are clearly motivated to join one of the internship and graduate programmes Rolls-Royce offers, don't miss this great opportunity!

**Rolls-Royce Plc will always collect and handle your personal data in accordance with applicable privacy legislation.*

For further details on what information is collected and how it is handled please contact the Rolls-Royce Global Data Privacy Team (Data.Privacy@Rolls-Royce.com).
